SD SOS Web Site on 4/2/2021 Shows 427,529 Ballots Cast in the state

SD SOS Total Votes County - 422,609 that's **4,920 short**

SD SOS Data from 9/22/2021 shows 428,501 total votes – **972 votes over**

SD SOS Data from 12/29/2021 shows 427,074 total votes – **455 votes under.**

Interesting Tidbits

When we looked at the 9/22/2021 data set we found:

- 163 Voters Voted on 11/3/2020, were Registered after the election.
- 552 voters registered 11/3/2020 and 49 voted in 11/3/2020 election
- 260 voters that voted on 11/3/2020 registered between 10/20/2020-11/3/2020 = not legal.
- Last legal date to register to vote for the 11/3/2020 election was 10/19/2020.
- Registrations 10/20/2020 and beyond are late per SDCL 12-4-5.
- 11 voters voted TWICE.
- 256 Voters with original registration date 100 years ago or more. 227 them are active status. This makes them 118 years old or older. The oldest person alive in USA is 113.

The Magic is Amazing

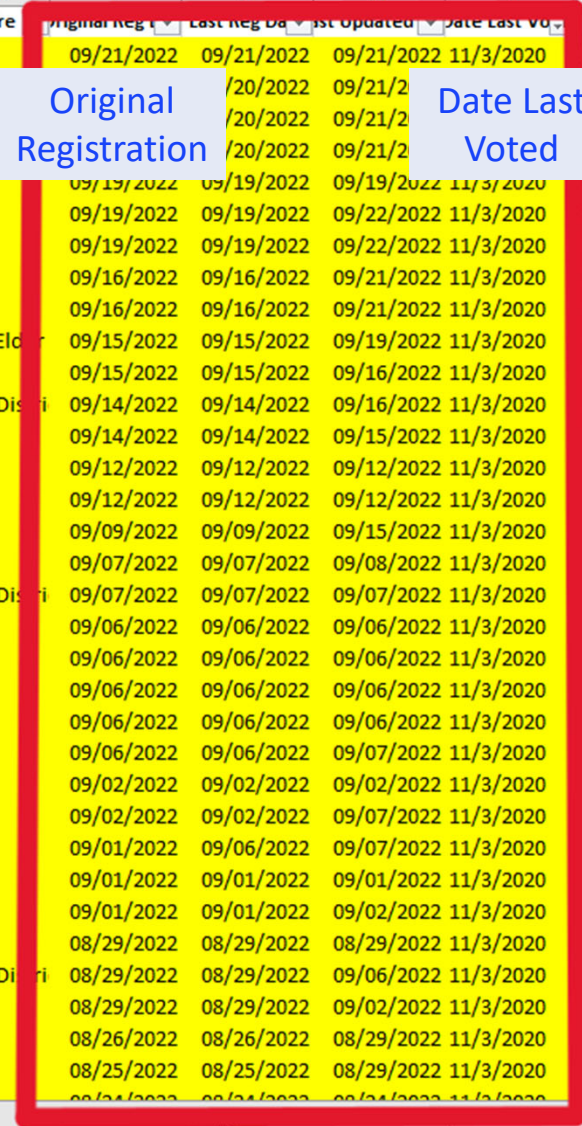

When we looked at the 12/29/2021 data set we found:

- 146 new records from 9/22/2021 with voter history for 11/3/2020 not recorded previously.
- 601 voter records removed since 9/22/2021 database.
- 36 new voters with original registration date 09.22.21 thru 12.23.21 VOTED 11/3/2020!
- 18 Records completely blank with active votes on 11/03/2020.

ONGOING ISSUE:

- Newly registered voters from end of 2020 – NOW with a vote recorded for 11/3/2020.
- This is a phenomenon for every election.

Americas Campground and Lodging, located right by the same building as Americas Mailbox Mail Forwarding and Home Base Services, is open year-round.

With the recent expansion, we now have:

- 64 full hook up
- 14 electric
- 12 boondock

For a total of 90 sites

Of course, we (currently) have 3 Guest Rooms and 1 Suite

Our future plans include adding another 20-25 more Guest Rooms (Studios)

Right now we can only accommodate self-contained RVs (those with a bathroom). In the future, construction will be complete on our new bathhouse - with shower, toilet and laundry facilities and we will then be able to take tents and truck campers. We'll have around 70 campsites for your pleasure, as well as camping cabins.

Social Security Master Death Index to remove deceased voters

We collected affidavits of:

Stolen Votes – vote was cast for a voter who did not vote

Phantom Votes – vote was cast by someone who doesn't live at that address

Lost Votes – voter claimed they voted, but there was no record of their vote

Deceased Votes – vote was recorded for voter after their date of death

Duplicate Votes – voters found at one address registered under two names with votes cast for both

Examples of Affidavits from Stolen Votes

2022. Mr. Stubbe stated he does not live in S.D. but is a full-time RVer. Mr. Stubbe stated he did not vote in the 2020 general election, however, the S.D. voter rolls record a ballot was cast for Mr. Stubbe on 11-3-2020.

Who is in Charge of the Voter Rolls?

The County Auditor Maintains the Voter Rolls:

12-4-2. County auditor in charge of voter registration records.

- The county auditor has complete charge of maintaining and safeguarding the voter registration records in the county. The county auditor shall retain all voter registration records in the auditor's office in paper or electronic form. All such records shall be open to public inspection at all times during office hours, except pursuant to §§ 12-4-9 and 12-4-9.3.

12-4-9. Master registration file--Contents--Public inspection--Limitations.

- The county auditor shall maintain and safeguard a file of voters in computer format that contains the information of each person registered in each voting precinct within the county. This file shall be known as the master registration file and shall be, at all times during office hours, open to public inspection. However, public access to social security numbers, driver license numbers, and dates of birth contained in the master registration file is prohibited. The master registration file shall contain all information from each voter's registration card. The master registration file shall also include the date of the last election the voter has voted in and when the voter's information was last updated. The master registration file may also contain additional voter history information. Any voter registration form for a purged or unregistered voter shall be kept for twenty-two months. No purged or unregistered voter may be included in the master registration file.

The County Auditor Maintains the Voter Rolls: Or do they?

- DMV and State Agency registrations bypass the Auditor.
- DMV and Mail Forwarding Companies auto filling voter registration and digitally affixing signatures.
- Auditor required to PAY the SOS office \$1.00/page for original documents to review registration qualifications.
- SOS office creates Total Vote user name and password for Auditor - NOT SECURE.
- Auditor told they do not have authority to purge voter rolls despite having knowledge of thousands that were not removed that should have been.

WHAT IS BPRO?

- Voter Roll Maintenance and Election Night Reporting System
- Located in Pierre, SD
- Created with HAVA Funds, commissioned by Chris Nelson
- First SOS Contract with Bpro – 2007 (CERS)
- Bpro expanded from voter roll maintenance to a centralized top-down election managing system
- 2009 – Nelson gives Total Vote to North Dakota. Campea buys Bpro.
- 2015 Jason Gant (former SOS) gave away the **state owned source code** to TOTAL VOTE to New Mexico in exchange for a sole source contract with Bpro. (Valued at \$1 million)

WHAT IS BPRO?

- 2020 Knowink receives \$10 million in capital from Hermann Cos for acquisitions. COO on the Board of Knowink.
- 2020 – Bpro bought out by Knowink of St. Louis.
- Knowink sells E-Poll Pads.
- Bpro locations and employees retained.

Risk of Poll Pads vs Paper Registration Rolls

What is an Electronic Poll Pad?

- 1) Direct Connection to SOS.
- 2) Live data over the internet.
- 3) Very Expensive.
- 4) Same Day Registration?

Brookings, Brown, Haakon, Hughes, Hyde, Potter, Sully, Yankton, Custer (Custer does not use vote centers, but uses ePollbooks)

Poll Pads

- Electronic poll books are connected to the internet.
- Voter rolls are monitored live during an election.
- E-Poll Books are NOT a certified piece of voting equipment.
- E-Poll Books allow for vote centers or super-precincts.
- Pennington County had check-in problems and poll book crashes in prior elections and discontinued use.

We strongly recommend banning Electronic Poll Books.

Agreed. We should always consider the insider threat.

I think it's potentially worse than that. It's a gift wrapped opportunity to an insider threat, however unlikely. I harp on the hash verification process because an insider with sufficient knowledge and physical access can do bad things to systems. How do we thwart that? Through good procedures, one of which is checking that what is installed on the system matches exactly with what was certified by the EAC. Under the current guidance from ES&S, an insider now knows specifically which file is not being inspected. It's similar to a bank robber knowing that the camera covering teller #3 is broken.

It sounds like this was also an issue with the stick upgrade process for 6.0.2.0. Was the SoS ever notified?

Why did votes go down?

WHAT??? VOTE DROPS IN SOUTH DAKOTA TOO? MONAE JOHNSON CANDIDATE FOR SOS LOST NEARLY 4,000 VOTES IN MINUTES.

2022 Election Night Data Report

During the election night volunteers downloaded every 5 minutes the election results spreadsheet data from the SD SOS Web Site Election Night Reporting System. Most data seems fine, until you take a closer look at some races where the vote totals dropped....this is highly unusual and requires further explanation as to why and how this can happen.

Albert Sensor Data Surveillance

ALBERT SENSORS

ALBERT SENSORS MONITOR TRAFFIC TO AND FROM THE NETWORK. THE DATA IS MONITORED BY THE CENTER FOR INTERNET SECURITY (CIS) REMOTELY. SOME STATES, LIKE WASHINGTON, HAVE PRESSURED THE COUNTIES INTO INSTALLING THESE MONITORING SYSTEMS ON THEIR COUNTY NETWORK. COUNTIES ARE UNABLE TO SEE OR MONITOR THE ALBERT DASHBOARD. THEY MUST ALSO ALERT CIS IF THEY INTEND TO MAKE ANY CHANGES TO THEIR OWN NETWORK 30 DAYS IN ADVANCE.

Albert sensors monitor the county's network, not the election systems. Aside from the many risks and inconveniences that come with installing the sensors, it may have some benefit for the county network. It does nothing for the election system, unless they are ready to admit the election systems are connected to the internet.

However, South Dakota Secretary of State Steve Barnett and county auditors who run local elections say they have reviewed the concerns and concluded that the electoral process in place in South Dakota is secure and that voters can trust the results of the Nov. 8, 2022, election.

“I’m very confident in our system, which is a bottom-up approach led by auditors at the county level, and I also know that our election laws are strong,” Barnett said. “We have paper ballots, our tabulating machines are not connected to the internet, and a statewide canvass is completed after election day.”

BPro is experienced with the data structure of voter registration data and data conversions through our successful delivery of election systems in six states. This includes building the South Dakota and Washington Voter Registration systems, which changed from “bottom-up” to “top-down” models with the implementation of TotalVote. In addition, BPro has built data exchanges for our customers to participate in both ERIC and Cross Check, in order to compare voter registration data with other states.

Centralized and Federalized

“When a person votes on Election Day, the ballot is counted by a tabulator and then transferred into our system,” explains Campea. “Our software reports the results and provides them to the media outlets.”

He adds “We’re the official people who know the results before anyone else.”

BPro staff are the first-receivers of election results in South Dakota and six other states—Montana, North Dakota, Nebraska, Hawaii, New Mexico and most recently Oregon, as well as Sacramento County in California and 11 Minnesota counties.

Cast Vote Records DO EXIST

1.2 Intended Audience

The intended audience of this specification includes election officials, voting system designers and developers, and others in the election community, including the general public. Some background in election administration and voting equipment is useful in understanding the material in this specification.

Note: The CVR's are geared for an audience of "THE PUBLIC".

Cast Vote Records DO EXIST

- The CVR is the audit trail for the tabulating machines.
- Each ballot scan is converted to a digital record.
- This function has been mandated SINCE 2005 by the EAC and NIST as a requirement for certification.
- Required for auditing, transparency and public trust.
- LIES WE WERE TOLD
 - CVR's don't exist
 - Our machines don't make them
 - State law doesn't allow for CVR's
 - We the people can't have them
 - They are proprietary information and will reveal a voter
- All of these excuses are FALSE.
- Not a single auditor in the state knew what a cast vote record was. Not one.

Cast Vote Records DO EXIST

Actionable Intelligence for The Fourth Turning.

“In the beginning of a change, the PATRIOT is a scarce man, and brave, and hated, and scorned. When his cause succeeds, the timid join him, for then it costs nothing to be a PATRIOT.”

Mark Twain

In the beginning of a fraudulent election, the election denier is a scarce man, and brave, and hated and scorned. When his cause succeeds, the RINOs join him, for then it costs nothing to be an election denier.
